Note importanti

Tessuti e pelli. I colori delle stoffe e delle pelli in campionario sono solo indicativi non essendo tecnicamente possibile assicurare la costanza di colore da una partita all'altra. Per la stessa ragione si declina ogni responsabilità per le richieste di accoppiamento.

Braccioli dx e sx. Nelle composizioni angolari la posizione dei braccioli (dx o sx) va intesa guardando il divano frontalmente.

Misure. Le misure si riferiscono all'ingombro totale dei prodotti, incluse eventuali sporgenze.

Divani su misura. Se le caratteristiche tecniche lo consentono, si possono realizzare divani su misura (solo nel senso della lunghezza) con una maggiorazione nel prezzo del 30% e tempi di consegna non inferiori a 50 giorni.

Letti su misura. Se le caratteristiche tecniche lo consentono, si possono realizzare dei letti su misura con le seguenti maggiorazioni:

- solo in profondità: +15%;
- solo in larghezza: +30%;
- profondità e larghezza: +30%.

Fodere di ricambio per i letti. Per tutti i modelli sfoderabili, il costo della fodera di ricambio in tessuto corrisponde al 30% del prezzo di listino.

Prelavaggio tessuti. Se le caratteristiche tecniche lo consentono, è possibile effettuare il prelavaggio del tessuto ad un costo di euro 15,00 al metro.

Tessuti cliente. I metraggi indicati nel presente listino si riferiscono a tessuti in tinta unita con altezza minima di cm 140 lavorabili.

Cura e manutenzione

Lavaggio tessuto. Prima di ogni lavaggio (sia in acqua che a secco) è assolutamente necessario ricoprire il velcro delle fodere con una fettuccia aderente, per evitare che le stesse si danneggino. Ciò consentirà anche di rivestire la struttura del divano con maggiore facilità.

Nel caso di lavaggio in lavatrice è opportuno mettere prima le fodere in ammollo per alcune ore affinché l'acqua venga assorbita uniformemente. Inoltre devono essere rivoltate per evitare lo sfregamento con il cestello della lavatrice (che non deve essere caricato troppo). Infine, bisogna fare attenzione che i detersivi usati non contengano sbiancanti.

La non osservanza di queste norme potrà determinare dei danneggiamenti del tessuto, quali ad esempio delle striature più chiare impossibili poi da eliminare.

Pulizia pelle. La pelle è un prodotto naturale: rughe, piccole cicatrici, disomogeneità di grana e altri segni ne denotano l'unicità ed il valore. La pelle è un prodotto "vivo" e non sopporta l'uso di creme o smacchiatori generici per mobili. Per una pulizia generale passare un panno bianco umido. Per macchie localizzate utilizzare solo prodotti detergenti specifici per la pelle.
